

Reinvent supply chain execution

It's no longer enough to optimize the performance of each segment of your supply chain. You need to view and operate your entire supply chain as a unified whole that encompasses your customers, contractors, and suppliers. Studies show that companies with the most fully integrated supply chain technology invariably rank among the top industry performers in every respect. That's why end-to-end supply chain visibility, combined with an efficient execution system, can help you make better decisions and execute those decisions more quickly and profitably.

Build a fully unified supply chain

Infor® Supply Chain Execution is the first solution to let you view and manage your supply chain execution activities as a coherent whole, so you can eliminate bottlenecks and improve all-around efficiency. By combining warehouse management, labor management, transportation management, and third-party logistics (3PL) billing in a unified solution with a common user interface, it unites your entire supply chain into an integrated, streamlined business process.

- With Infor Supply Chain Execution, you can run your supply chain like a single, well-tuned machine.

Benefit from comprehensive expertise

Infor brings decades of experience to every level of your supply chain operations, to give you complete control and total visibility over every aspect of your business. Our software embodies expertise that spans everything from sourcing to manufacturing to distribution, so you can deal effectively with your daily challenges.

Get industry-specific functionality

Infor Supply Chain Execution can help you to reinvent your company's supply chain execution process through innovative technology, core industry-specific features, and a consumer-grade user interface. With Infor Supply Chain Execution, you'll be able to optimize your resources, streamline all your supply chain activities, and socially collaborate like never before.

No matter your industry, you'll gain a competitive edge, thanks to Infor Supply Chain Execution's core industry specific features. If you're a manufacturer or grocer, for example, you can have centralized and complex billing functionality for 3PLs, shelf-life management, voice enablement, and labor performance management capabilities. The fashion industry can take advantage of end-to-end tracking and capture of size, color, and style attributes. Healthcare

companies can benefit from the common receiving process, healthcare dashboards, and industry metrics (such as picking by area, location analyst, and labor statistics by user group and area).

Groundbreaking technologies add even more power to these proven solutions by making every Infor application instantly ready to connect with the systems you use most frequently—so that you can work faster and smarter to get better results every day. Innovations include our social collaboration platform, mobility applications, intelligent analytics, dashboards, and voice enablement—all of which can help you take your company's supply chain processes to the next level.

Additionally, flexible deployment options give you the choice between on-premise implementations, in the cloud, or hosted.

Stay ahead of your competition

To stay competitive in a world where speed is the key to success, Infor Supply Chain Execution helps you improve the end-to-end velocity of your supply chain execution activities, while also improving order accuracy and shipping efficiency.

Reinvent your supply chain execution process

With Infor Supply Chain Execution, you get cutting-edge tools and capabilities, such as:

- **Extensive collaboration tools**—Infor Supply Chain Execution provides extensive collaboration tools that give you wide-reaching business collaboration capabilities for your warehouse and logistics operations. You'll be able to follow people, tasks, events, and processes, so users can quickly react to changing customer and market requests. You'll also be able to organize conversations into streams and make all communications traceable, so that you can quickly find the discussions and documents you need.
- **Dashboards**—Infor Supply Chain Execution comes with industry-specific dashboards that provide specific metrics and KPIs for your industry (including healthcare, 3PL service providers, and retail logistics management). You can create customized dashboards that present only relevant in-context information right on your screen that gives you a direct approach for evaluating and applying data.
- **Warehouse Director**—To help streamline management of critical functions, such as expected work volume, location queries, and inventory levels, this state of the art Apple™ iPad® app gives you inventory heat maps and zoom-able overviews of the warehouse floor, and color-coded metrics to make it easy to visualize management of incoming and outgoing workloads at a glance. You'll be able to optimize your warehouse and monitor operations more efficiently using color-coded picking and velocity heat maps. You'll gain a real-time view of warehousing activities from a simple, easy-to-use mobile platform along with the flexibility to work from a remote location.
- **Radio frequency (RF) picking**—Improve picking efficiency with Infor Supply Chain Execution's intuitive, HTML5-based RF picking screens. You can use product image information to quickly identify the right products, as well as view entire conversation threads and reply to messages.
- **Voice-activated control**—Infor Supply Chain Execution gives you a new level of control, convenience, and efficiency with voice capabilities. Your operators will gain hands-free interaction along with the ability to perform tasks such as picking, cycle management, and replenishment using only voice-activated commands.
- **Intuitive integration**—Infor ION® technology improves visibility and speeds the flow of information across your organization by making it easier than ever for you to integrate Infor Supply Chain Execution with your existing ERP solutions.
- **Industry specific functionality**—Infor Supply Chain Execution gets you up to speed quickly by addressing the issues that are unique to your business, with a repertoire of focused capabilities for a range of industries including 3PL service providers, food, retail, high tech, distribution, fashion, healthcare, and manufacturing.

Best-of-breed capabilities

By unifying your entire supply chain execution process, you get the power you need to function effectively at any scale, along with the detailed control required to operate at maximum efficiency. Infor Supply Chain Execution combines capabilities to address your most crucial supply chain functions.

Warehouse management

With Infor Supply Chain Execution, it's easier than ever to manage and monitor every facet of your warehousing and distribution needs, including picking, shipping, receiving, dynamic slotting, and put away, as well as more strategic functions such as order processing, wave planning, inbound quality control, and VAS operations. You'll be able to improve various core warehousing processes thanks to flexible, industry-specific features. For instance, you can choose between different types of pick methods, putaway strategies, and data capture, depending on your industry and warehouse design.

You can also raise your performance to an even higher level by configuring Infor Supply Chain Execution to support advanced functions such as RF and voice support, serial number tracking, advanced kitting, task interleaving, cartonization, and carrier compliance labeling. By taking advantage of our strategic partnership with Kewill, Infor now offers enhanced capabilities and support for supply chain quoting, rating, and manifesting for small parcel shipping, as well.

Take advantage of Infor Supply Chain Execution's warehouse management capabilities to:

- Optimize your warehousing activities with innovative features such as task interleaving, cross-docking, trans-shipment, facility viewer, end-to-end serial number tracking, dynamic slotting, and backflush capability.
- Achieve greater visibility through interactive dashboards, reports, analytics, and business intelligence.
- Manage your warehouse operations on the go using Infor Supply Chain Execution's Warehouse Director.
- Minimize costs by streamlining inventory, automating tasks, and optimizing resources.
- Collaborate, communicate, and be notified of alerts.
- Integrate seamlessly across various products and platforms using Infor ION.

More best-of-breed capabilities

Additional capabilities that let you address your most crucial supply chain functions include:

Labor management

Sharpen your ability to direct, track, measure, and report on all labor-related activities within your operation with Infor Supply Chain Execution's powerful labor management features. This powerful assortment of tools helps you drive and monitor labor efficiencies, including all aspects of labor planning and forecasting. Individual task management profiles give you a quick, easy way to make the most of your operators' skill sets, thanks to built-in task directed management features in Infor Supply Chain Execution. You can also dynamically monitor staff performance against engineered labor standards. With travel speed configuration and labor plan estimates based on average or historical actuals, you can manage labor within the warehouse more efficiently. Infor customers frequently achieve dramatic performance improvements through improved warehouse labor management.

3PL billing

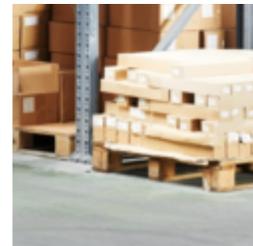

If you're a 3PL firm or need to track operating costs by division, you need the rich, fully integrated 3PL billing features in Infor Supply Chain Execution. With these powerful capabilities, you can simplify management of your billing and invoicing requirements and centralize billing across multiple facilities. As a result, you'll improve your collection process by reducing days of sales outstanding and enhance overall customer service. You'll be able to bill customers more accurately through enriched reporting, improved costing models, and billing for labor charges.

Transportation management

Your transportation network can achieve unparalleled performance by leveraging the most powerful transportation planning algorithms anywhere to gain all the power you need for optimized and fully configurable routing and rating processes in a single, unified application.

Tear down the walls

When you pull your entire supply chain execution operation together and get it operating as a cohesive whole, you'll be in a position to focus on more strategic decisions, rather than staying mired in routine transactions. With Infor Supply Chain Execution, you'll improve the performance of all the routine tasks that determine your success as a business and lead to operational excellence.
